

## SAGEMCOM HAS SUCCESSFULLY DEPLOYED G3-PLC ELECTRICITY METERS WITH ENEXIS.

October 14, 2013

### PHASE 2 OF THE DEPLOYMENT BY ENEXIS OF G3-PLC METERS FROM SAGEMCOM CONFIRMS THE ROBUSTNESS OF THIS TECHNOLOGY THAT IS NEEDED FOR A MASS ROLLOUT OF G3-PLC.

The first assessment of the deployment of G3-PLC meters in the Netherlands by Enexis, for which more than half have been supplied by Sagemcom, has demonstrated the robustness of this solution and its interoperability between several suppliers.

For Lonneke Driessen, Enexis Smart Metering Technology Director: *“When we started our field trials in G3-PLC, we were hoping to get much better results than with our former tests in S-FSK PLC. We have been very positively surprised by the good results and we are quite confident for the mass rollout.”*

This second phase of the project G3-PLC of Enexis is the proof of the maturity of the G3 Standard and confirms the efficiency of the PLC solution which allows to match the level of services for data collection and alarm monitoring of GSM/GPRS.

Today, Sagemcom deploys G3-PLC technology in different European countries, proposing to its customers single-phase and three-phase meters and data concentrators. *“This illustrates the strategy of Sagemcom: We have made the choice to develop all the electricity Smart Meters technologies to answer our customers’ needs, in order to meet their expectations and to the constraints and specificities of their markets”* concludes Eric Rieul, Deputy CEO of Sagemcom Energy & Telecom.

#### **About Sagemcom**

A French high-tech group of international dimensions, Sagemcom operates on the broadband (digital home, set-top boxes, Internet routers, telephony and multimedia terminals), telecoms and energy (smartgrid and energy management) and document management (printing terminals, software and solutions, digital production workflow) markets.

With a revenue of around 1.3 billion euros, Sagemcom employs 4,600 people on five continents; currently a European leader on most of its key markets, Sagemcom aims to become a world leader in communicating terminals with high added value.

Sagemcom has provided support for its clients for the last 25 years by preparing and implementing their energy management projects, and by deploying secure and sustainable metering solutions, from meters to information systems.
