

**CES 2014:  
SAGEMCOM IS THE FIRST GLOBAL  
MANUFACTURER TO PROPOSE CAT-IQ 2.0-  
CERTIFIED DECT PHONES ON THE US MARKET**

January 6<sup>th</sup> 2014

**SAGEMCOM RESIDENTIAL PHONES SHIP ALL THE LATEST FEATURES OFFERED BY CAT-IQ 2.0 TECHNOLOGY, PLACING HD VOICE AND DIGITAL SERVICE ACCESS AT THE DISPOSAL OF AMERICAN CONSUMERS.**

Sagemcom is the first global player to obtain CAT-iq 2.0<sup>1</sup> certification for the American market, and to bring to market in the United States DECT phones that incorporate this new technological standard.

Its Sagemcom D68HD DECT, currently in production, perfectly illustrates this technological innovation. This cordless residential phone with its cutting-edge technology combines all the latest digital features (second call management, smart phonebook, etc.) with HD voice, to offer an unparalleled and complete user experience, while maintaining the ease of use and installation so appreciated by consumers.

The Sagemcom DECT phone also features a high-design base which offers HD audio quality that can be activated from any compatible residential gateway.

This then gives Sagemcom access to a vast market on which the Group will be in pole position to propose latest-generation DECT solutions.

**About Sagemcom**

A French high-tech group of international dimensions, Sagemcom operates on the broadband (digital home, set-top boxes, Internet routers, telephony and multimedia terminals), telecoms and energy (smartgrid and energy management) and document management (printing terminals, software and solutions, digital production workflow) markets.

With a revenue of around 1.3 billion euros, Sagemcom employs 4,600 people on five continents; currently a European leader on most of its key markets, Sagemcom aims to become a world leader in communicating terminals with high added value.

Sagemcom has provided support for its clients for the last 25 years by preparing and implementing their energy management projects, and by deploying secure and sustainable metering solutions, from meters to information systems.
