

CES 2014 – SAGEMCOM UPDATES ITS BROADBAND MEDIA GATEWAYS SOLUTIONS

January 6th 2014

AT CES LAS VEGAS, SAGEMCOM PRESENTS A NEW RANGE OF BROADBAND MEDIA GATEWAYS ENABLING END-TO-END GIGABIT RATE ALLOWING ENHANCED SERVICES.

The new Sagemcom residential gateways range integrates latest available technologies for high speed access and content redistribution.

Sagemcom gateways are available for any broadband access like ADSL2+/VDSL2 with vectoring and bonding capabilities, DOCSIS 3.0 24x8, GPON and LTE and integrates several wireless connections, WiFi, including the latest "802.11ac" standard offering wider coverage and reliable use.

Incorporating these advanced technologies allows accessing to services distributed from end-to-end with gigabit-plus bandwidth.

The Sagemcom solutions are designed to be modular and compatible with any North American Telcos and MSO requirements.

Sagemcom presents these new broadband solutions at CES Las Vegas with demonstration of Gigabit high power dual-concurrent Wifi 802.11ac, Headless Gateways transcoding and content redistribution and home automation new services.

"Thanks to this comprehensive range of next generation products provided by Sagemcom, operators can offer the latest innovations available on the market, combining high performance, new services and high level of scalability" says Ahmed Selmani, Deputy CEO of Sagemcom Broadband SAS.

About Sagemcom

A French high-tech group of international dimensions, Sagemcom operates on the broadband (digital home, set-top boxes, Internet routers, telephony and multimedia terminals), telecoms and energy (smartgrid and energy management) and document management (printing terminals, software and solutions, digital production workflow) markets.

With a revenue of around 1.3 billion euros, Sagemcom employs 4,600 people on five continents; currently a European leader on most of its key markets, Sagemcom aims to become a world leader in communicating terminals with high added value.

Sagemcom has provided support for its clients for the last 25 years by preparing and implementing their energy management projects, and by deploying secure and sustainable metering solutions, from meters to information systems.
