

## Philips PicoPix PPX 4350 Wireless: the ultra-connected pocket projector

*The PicoPix PPX 4350 Wireless allows you to project your most recent photos, multimedia content and videos anytime, anywhere... without cables. Marketed by Sagemcom under the Philips brand, this is a must-have companion for connected young people.*

With the Philips PicoPix PPX 4350 Wireless, Sagemcom, the European leader in pocket projectors, provides a distillation of technology responding to the needs of young consumers, extreme sports fans and anyone on the look-out for the latest products in terms of connectivity and mobility.

### Mini-size; maxi efficiency

It is so small (you can hold it in the palm of your hand) that you can slip it into your pocket and take it anywhere. Wherever you are, it's easy to share photos, videos and multimedia content. The WavEngine projection system (50 Lumens) and LED technology make it possible to project HD content with brilliant colours, with a diagonal of up to 60" (152 cm).

### Ultra-connected

To access photos, videos and all multimedia content contained in tablets and smartphones, the PicoPix PPX 4350 Wireless is ultra-connected. With Wi-Fi, mini HDMI and micro SD card connections, the projector links up easily with numerous devices. For even greater independence, the PPX 4350 Wireless incorporates a soundbar.

Thanks to its audio Bluetooth function, sound can be amplified by linking up to any external loudspeaker, thus producing exceptional sound quality in a genuine "home cinema" experience – all with a device you can hold in your hand. In addition, with its Wi-Fi dongle and Miracast technology, it is easy to project holiday photos and videos from your smartphone or tablet without using any cables.

## Totally autonomous

With the USB QuickLink, there's no need for any other cable: it can be used as a wrist-loop to take the PicoPix PPX 4350 Wireless anywhere, in total independence. When it is detached, you can use it as a USB port to view your favourite films and TV series, charge the projector or connect it to a majority of devices. Users can thus link up directly with their cameras, external hard drives or USB sticks to project their content onto any wall: so it's a real little pocket cinema. Using the PicoPix PPX 4350 Wireless, you can also share your computer screen via the USB connection for impressive projections at work. Its 4 GB of internal memory means that you can load films directly onto the PicoPix, and enjoy a "trip to the cinema" while on holiday or travelling.

## An indispensable outdoor companion

With its streamlined looks, the PicoPix PPX 4350 Wireless will appeal to all fans of design. And it is also a genuine "Swiss army knife", with numerous dedicated outdoor functions, including SOS, flash and warning light features. The PicoPix PPX 4350 Wireless is thus an essential companion for all situations.
