

Dr. Neuhaus Telekommunikation

Mobile Network Code

The Mobile Country Code (MCC) is the fixed country identification. The Mobile Network Code (MNC) defines a GSM-, UMTS-, or Tetra radio network provider. These numbers will be allocated autonomously from each country. Only in the alliance of both codes (MCC + MNC) the mobile radio network can be identified.

Dr. Neuhaus Telekommunikation

Mobile Network Code

The Mobile Country Code (MCC) is the fixed country identification. The Mobile Network Code (MNC) defines a GSM-, UMTS-, or Tetra radio network provider. These numbers will be allocated autonomously from each country. Only in the alliance of both codes (MCC + MNC) the mobile radio network can be identified.

Mobile Network Code

The Mobile Country Code (MCC) is the fixed country identification. The Mobile Network Code (MNC) defines a GSM-, UMTS-, or Tetra radio network provider. These numbers will be allocated autonomously from each country. Only in the alliance of both codes (MCC + MNC) the mobile radio network can be identified.

Mobile Network Code

The Mobile Country Code (MCC) is the fixed country identification. The Mobile Network Code (MNC) defines a GSM-, UMTS-, or Tetra radio network provider. These numbers will be allocated autonomously from each country. Only in the alliance of both codes (MCC + MNC) the mobile radio network can be identified.
