

SAGEMCOM PRESENTS ITS NEW POWERLINE COMMUNICATION RANGE

July 2013

SAGEMCOM, MARKET LEADER FOR HIGH SPEED INTERNET IN EUROPE, ENHANCES ITS PRODUCT RANGE WITH THE LAUNCH OF A WHOLE NEW GENERATION OF HIGH PERFORMANCE POWERLINE ADAPTERS, DESIGNED TO ALLOW USERS TO FULLY BENEFIT FROM THEIR SMART TV.

Sagemcom offers an extensive range of the latest high-end PLC (Power Line Communication) adapters, with a theoretical speed of 500 Mbps.

The range boasts the following key features: Presence or not of an electrical power socket (passthrough) with integrated filter, up to 3 Ethernet ports, WiFi connection possible.

All products are compatible with the previous generation of hardware offering a theoretical speed of 200 Mbps and compliant with the HomePlug AV standard.

Plug and play, the various products from the Sagemcom PLC range are the ideal solution to fully benefit from your Smart TV or Internet connectable device. Thanks to these adapters, connecting your television to the Internet is easy, no matter where it is located in the house. An initial adapter connected to your home gateway transmits the Internet signal to your home's existing electrical network. A second adapter connected to the relevant hardware - Internet connectable TV or other device (game console, computer, etc.) - completes the set-up.

Full hardware compatibility means you can install up to 8 adapters on any one network. Finally, the WiFi version makes it possible to create a local wireless network, allowing you to use your tablet or smartphone in the house without worrying about losing the signal.

Must-have products if you're looking for a high speed, high performance Internet connection for every room in the house!

Now available

Recommended retail price (distributors are free to set their own pricing policies):
