XMEDIUSFAX™ IS NOW INTEROPERABLE WITH BROADWORKS SIP INTERFACE

SAGEMCOM'S XMEDIUSFAX™ APPLICATION HAS BEEN CERTIFIED ON THE BROADSOFT PLATFORM.

MONTREAL, Canada (May xxx, 2013) - Sagemcom, a global leader in advanced fax server solutions for IP networks since 2002, is announcing that XMediusFAX™ 7.0 has been successfully validated as interoperable with BroadWorks Release 19 SIP interface by Broadsoft.

BroadWorks, a VoIP communications application server, enables Service Providers to offer a comprehensive portfolio of value added business and consumer communication applications from a unique network platform. BroadWorks delivers communication solutions that integrate video, fax, voice and email communications for businesses and consumers worldwide, whether through IP PBX/Centrex, Mobile PBX, Business Line, Trunking and consumer solutions.

XMediusFAX™ 7.0 helps businesses leverage their IP network and IP telephony initiatives, by allowing users to easily and securely transmit orders, records, reports, and confidential documents directly from popular Microsoft Office products, ERP and CRM applications.

Thanks to this new technology partnership, Sagemcom now expands the choices available to Broadsoft customers. By integrating multiple forms of communication, Sagemcom's XMediusFAX™ FoIP solution helps companies and end users increase their employee productivity and reduce their costs.

The XMediusFAX™ application will enrich Broadsoft's Unified Communication offering with a cost-saving boardless fax solution. Broadsoft's customers will be able to add faxing as part of their service offering to their clients with no hardware investment. It will also enable them to have access to a virtualized environment to send and receive their faxes from remote locations.

Sagemcom hopes to help support the Broadsoft community by offering its partners a leading edge fax software technology that integrates easily into their Broadworks environment.

"Thanks to our new collaboration with BroadSoft, our partners can produce a new stream of revenue while increasing their level of customer satisfaction and retention by simply including Fax to complete their portfolio of VoIP communication services offering" stated Jean Champagne, General Manager of Sagemcom Canada.

This new technology partnership will allow Sagemcom to increase its market presence and reach new customers who interoperate with BroadWorks.

About Sagemcom

French high-technology group with an international dimension, Sagemcom operates on markets of broadband (digital home, digital set-top box, broadband and residential terminals), telecom and energy (telecommunications infrastructure, smartgrid and metering), and management of documents (printing terminals, software and solutions, digital production workflow). With a turnover of about 1.3 billion Euros, Sagemcom employs 4 600 people on five continents; already a European leader in most of its key markets, Sagemcom aims to become a world leader in high added value communicating terminals. Sagemcom is strongly committed to sustainable development through the life cycle of its products: eco-design, energy consumption, ethical code of all its suppliers.
