Sagemcom Unveils XMediusFAX® 8.0

Major software release enriched with a mobile app optimized for iPad and iPhone, security reinforcements and an improved user experience

Montreal, Canada (November 24, 2015) – Sagemcom, a global leader in secure document exchange solutions, today announced the release of XMediusFAX® 8.0, the latest version of its internationally recognized FoIP solution.

This major release brings several benefits to both end-users and IT system administrators, including:

- **Increased mobility:** Users can now securely send faxes directly from an iPhone or iPad app, following straightforward steps and intuitive navigation. This app is perfect for faxing a picture of sensitive documents immediately upon signature while on the road.

- **Security reinforcements:** Users and administrators can now configure fax deletion options for zero retention--faxes can be deleted immediately after successful delivery. This is especially useful for organizations in the healthcare and financial sectors that are required to comply with strict data management security policies.

- **Improved user experience:** A built-in viewer in the Web client allows users to view faxes directly in their browsers without having to download files. Several display options including a thumbnail view, zoom controls, and fit width/height and rotation buttons improve navigation.

"Innovation is at the absolute core of what we do. We uphold this commitment by constantly advancing and enhancing our secure document exchange solutions based on our customers' ever changing needs," said Jean Champagne, General Manager of the Enterprise Solutions Department at Sagemcom Documents.

"Innovation must also come with stability and robustness, and XMediusFAX® 8.0 is a perfect combination of features that enhance the user experience and improve security and performance."

XMediusFAX® is one of the most secure, reliable and scalable Enterprise FoIP solutions available in the market today. XMediusFAX® is a perfect fit for a wide variety of vertical markets, including the healthcare, government, education, finance and legal sectors.

About Sagemcom
A French high-tech group of international dimensions, Sagemcom operates on the broadband and (digital home, set-top boxes, Internet routers, telephony and multimedia terminals), smart city (smart meter, smart grid, smart site, smart infra, smart services) and Internet of Things (founding member of LoRa Alliance) markets.
