

Kick-Off for project SPIRiT

E.ON Energie Deutschland and Sagemcom Fröschl start together...

Munich/Walderbach. With the "SPIRiT" project, E.ON Energie Deutschland GmbH and Sagemcom Fröschl GmbH have taken the step into a common future. The Sagemcom Siconia TM EMT system is hosted in the data center of Schleupen AG and ensures data reception and processing of existing and future meter infrastructure.

In the future, the highly complex processes will range from the reception and decryption of the data to the allocation to customer and balancing groups, to the transmission via market communication. The Fröschl system is continuously adapted to the E.ON requirements according to the specifications of the BSI and project-specific specifications. The hosting is executed at a data center which is certified according to ISO 27001. Thus, data security can be guaranteed.

The project consists of several subprojects that are implemented within 3 years using an agile project methodology.

One of the aims is to integrate the MDM system into the E.ON system landscape in order to support the company's sales activities.

About Sagemcom Fröschl GmbH:

Since 1994 Sagemcom Fröschl is an international software company since in the field of data acquisition and management. Since Sagemcom acquired the shares at the end of 2012, we have been the competence center for MDM software in the global Sagemcom group. www.froeschl.de

About E.ON Energie Deutschland GmbH:

E.ON Energie Deutschland GmbH is a nationwide leading energy company and holding company of the E.ON sales department in Germany. Around 3,000 employees ensure the reliable supply of electricity and natural gas at fair prices at all times and with a customer service that has won numerous awards. In addition, we are the solution provider for an increasingly decentralized, ecological and digital energy world, for example, with service and advice regarding photovoltaic, energy storage, energy checks and efficiency measures.
