

Manufacturer's Declaration on the Implementation of Packaging Regulations to Prevent and Recycle Packaging Waste

- Sagemcom Dr. Neuhaus GmbH sells only products that are not used by private consumers (acc. to Packaging Code, Section 3 para. 11). Thus, the participation in a system based on Section 6 of the Packaging Code is not required.
- As soon as the scope of delivery allows, the products are shipped on CEN pallets to be returned and reused.
- The transport and sales packaging of our products consists exclusively of paper and cardboard products (PAP). This is ensured by clearly defined processes. Outer packaging as defined in Packaging Code, Section 3 para.1 is not used.
- For component groups from the sale of our production activities (Customer Order Production division), every effort is made in cooperation with the customer to ship the parts in reusable bulk packaging.
- The conditions for the return of packaging or the corresponding costs are to be arranged with the customer, taking all environmental aspects into account. Sagemcom Dr. Neuhaus GmbH will commission an approved waste disposal company with the environmentally compatible disposal of returned packaging.
