

Sagemcom Introduces Cutting-Edge ANSI Advanced Meter Technology

Bois-Colombes, France, February 21th, 2024

Sagemcom will unveil the ANSI Advanced Meter platform from its SICONIA® product family at DISTRIBUTECH 2024 in Orlando, Florida. Sagemcom, a global leader in providing cutting-edge automated metering infrastructure (AMI) solutions for energy and water, is expanding its product portfolio to address smart metering for residential and commercial applications in North America.

SICONIA's advanced metering family is designed to foresee the expectations of utilities and meet the diverse needs of end customers. By integrating edge intelligence with Artificial Intelligence (AI) into our metering solution, we can seamlessly transform raw granular data into actionable intelligence. This enriched information, combined with Wi-Fi communication, offers consumers access to a home energy management solution, enabling them to balance their distributed energy resources (DER), such as solar panels, home storage, and electric vehicles, according to their preferences.

SICONIA®'s edge intelligence is key to upholding a resilient grid and efficient energy distribution. It accurately forecasts demand patterns, particularly in the presence of renewable energy resources, allowing for a more personalized energy-reduction strategy for consumers. Moreover, it incorporates anomaly detection, equipping utilities with the tools to make informed decisions and ensuring a reliable energy infrastructure.

In the dynamic nature of energy distribution, where seamless connectivity is paramount for operational success, SICONIA introduces an interoperable communication solution that supports either radio frequency (RF) or cellular communications. This diverse range of communication portfolios from SICONIA ensures robust connectivity in various challenging environments.

“We are proud to introduce an advanced smart meter for North America representing a significant leap forward in energy monitoring technology, providing consumers and utilities with a reliable and efficient tool for effective energy management and contributes to a more sustainable and resilient energy future. SICONIA reflects our commitment to driving innovation and environmental responsibility in the energy sector.” said Eric Rieul CEO of Sagemcom Energy and Telecom.

The SICONIA® Smart Meter family promises to transform the way we monitor, manage, and consume energy, ushering in a new era of efficiency and sustainability.

Sagemcom

About Sagemcom

Thanks to the innovative solutions designed and built by our people, Sagemcom provides access to broadband Internet, entertainment and managed energy supply to the greatest number all over the world.

As a “mission-driven company” since January 2022, Sagemcom makes sure that the design, construction and use of these solutions are sustainable, and fulfil the environmental and societal commitments that are known and shared by all our employees, partners and stakeholders. Sagemcom is the world leader in Broadband products and solutions, and the European leader in smart metering.
