

Sagemcom at Network X 2026: New technology cycle with advanced broadband, high reliability Wi-Fi 8 and AI-powered services

Bois-Colombes, October 13, 2026

Sagemcom will showcase at Network X 2026 (13–15 October, VIECON, Vienna, booth #J20) the new advanced broadband solutions.

Sagemcom will show next-generation solutions for 50G-PON, DOCSIS 4.0 and 5G Advanced, and the related Wi-Fi 8 range, designed for reliability, security, and sustainability. Fully tested in the main industry plugfests and available with prpl and RDK middleware, these solutions will enable help operators deploying successfully all these new technologies.

Sagemcom software suite helps operators manage devices and customers. CMS monitors home devices from a single platform, the Service Store (based on LCM) deploys and updates services smoothly and remotely without a firmware upgrade, and SAIA® delivers fast and tailored solutions aiming to improving customer satisfaction, further increasing the NPS (Net Promoter Score) and reducing the operator operational costs.

Sagemcom have already widely adopted AI in the design process, software engineering and the creation of value-added AI-powered services.

Sagemcom is also bringing to market innovative solutions to help operators protect their installed base against cybersecurity issues by deploying safe software, and anticipating detection and response to any threat.

Sagemcom will also unveil a new version of Nexa™, its mobile backup solution, with simpler onboarding and faster switchover, which results in less outage complaints and a premium service for operator business streams.

"A new revolution in the broadband technology is starting, and its value will come as much from services as from the network," said Boris Nabadryk, Senior Executive Vice President and Managing Director of Sagemcom Broadband Solutions. "We innovate on both: high performance and ready on time hardware, and AI-powered secured software solutions that turn it into services."

About Sagemcom

All over the world, thanks to the innovative solutions designed and built by its teams, Sagemcom provides, to the greatest number of people, access to broadband Internet, entertainment, and managed energy supply. As a "mission-driven company" since January 2022, Sagemcom makes sure that the design, construction and use of these solutions are sustainable, and fulfil the environmental and societal commitments known and shared by all its teams, partners and stakeholders. A technology leader in its markets, Sagemcom is 30% owned by its employees, has achieved over \$2.7 billion turnover in 2025, and is profitable since it was founded.
